# Dragons™

WRITTEN by PHIL MASTERS  ILLUSTRATED by ALEX FERNANDEZ

**STEVE JACKSON GAMES**

# Fang . . .

Ancient and primal, with reptilian scales, poison blood, and furnace breath, dragons stalk our nights. They wrap gleaming coils around us, and sleep on beds of gold and gems, waiting for the hero who will slay them. In our dreams we feel the sun gleaming from polished scales. We ride the winds and summon the storm cloud. And with pearls beneath our jaws, we ascend to heaven.

# . . . and Claw . . .

This book is about myths, dreams, and nightmares. It looks at dragons from all around the world, East and West, Old World and New. It tells their stories, and presents the hard facts in *GURPS* terms. *Dragons* includes one extended campaign setting and several shorter ideas, focused on dragons in all their variety – from a world suddenly devastated by monsters, to an interstellar empire where dragons serve as starships.

# . . . and Fiery Maw!

There is no monster more central to the idea of heroism. Fighting a dragon can be a supreme adventure; roleplaying a dragon can be a supreme challenge. Come on in, and meet your dreams and nightmares. But remember what happens when you play with fire.

***GURPS Dragons*** includes an appendix that converts the game material to *GURPS Fourth Edition* rules!

**STEVE JACKSON GAMES**  
[www.sjgames.com](http://www.sjgames.com)

*GURPS Basic Set, Third Edition Revised* and *GURPS Compendium I* are required to use this supplement in a *GURPS* campaign. The information in this book can be used with *any* game system.

# INTRODUCTION

Throughout history, dragons have captured the imagination. Legends from every inhabited continent have described forms of dragons. They have been gods, elementals, sages, ravening monsters, demons, messengers, guards, terrifying adversaries, or all of these at once.

The dragon is a part of all our dreams. He stalks our nights, wraps his gleaming coils around us, and sleeps on a bed of gold and gems, waiting for the birth of the hero who will slay him. In the draconic parts of our subconscious, we breathe fire and poison. We feel the sun gleaming off our polished scales. We ride the winds and summon the storm cloud. We clench our iron-hard talons and find purchase in solid rock. And with pearls beneath our jaws, we ascend to heaven on dragon wings . . .

In plain *GURPS* terms, dragons are powerful beings that easily weigh in at vast point totals. But that does not preclude using them in many ways. When encountering dragons, human PCs must understand what they face – which may not be obvious at first. Likewise dragon PCs must understand the uses and also the limitations of power. This book explains dragons in all their aspects – their history, their nature, and their uses in games.

## What Is a Dragon?

Dragons are mythical creatures, often possessing features from several natural species.

That is not very specific, but then, “dragon” is a flexible word. Folklore refers to dragons as giant serpents, sea snakes, and all manner of flying or fire-breathing creatures. These monstrous hybrids are fearful in nature, but does that make them draconic?

Despite the wide variety, “dragons” worthy of the name do share common traits. The reptilian features are universal. Also, it is unusual for any creature described as a dragon not to have at least one of the following: a highly supernatural nature, unnatural size, an association with water or the weather, guardian duties, a treasure hoard, or the ability to breathe fire or poison. This book uses this definition, but also assumes that, if a casual observer calls something a dragon, it deserves discussion here.

## Third and Fourth Edition *GURPS*

This book was initially created as a supplement for the Third Edition of the *GURPS* rules. However, it appeared around the same time as the new Fourth Edition rule set. For agreement with both editions, we added an appendix, converting all the necessary rules-related material for the Fourth Edition. See pp. 144–156.

## About the Author

Coiled in his lair, Phil Masters contemplates what he has wrought. His place in secret lore is secured by *GURPS* works such as *Arabian Nights* and *Atlantis*, along with work on the *Discworld* and *Hellboy Roleplaying Games* and *Transhuman Space* line. He regularly matches wits with bands of adventurers – strictly as the GM of roleplaying sessions, which, admittedly, seems safest to him.

He prefers not to sleep on a bed of gems and gold, though (a decent modern mattress is so much better for the back). His scales remain unformed – he has seen a mere 45 years, young for a dragon.

## About the Illustrator

Alex like to draw pictures. Alex no like word things.

## About *GURPS*

Steve Jackson Games is committed to full support of *GURPS* players. We can be reached by email: [info@sjgames.com](mailto:info@sjgames.com). Our address is SJ Games, P.O. Box 18957, Austin, TX 78760. Resources include:

*New supplements and adventures.* *GURPS* continues to grow – see what’s new at [gurps.sjgames.com](http://gurps.sjgames.com).

*Warehouse 23.* Our online store offers *GURPS* print items, plus PDFs of our books, supplements, adventures, play aids, and support . . . including exclusive material available only on Warehouse 23! Just head over to [warehouse23.com](http://warehouse23.com).

*Pyramid* ([pyramid.sjgames.com](http://pyramid.sjgames.com)). For 10 years, our PDF magazine *Pyramid* included new rules and articles for *GURPS*, plus systemless locations, adventures, and much more. The entire 122-issue library is available at Warehouse 23!

*Internet.* To discuss *GURPS* with our staff and your fellow gamers, visit our forums at [forums.sjgames.com](http://forums.sjgames.com). You can also join us at [facebook.com/sjgames](http://facebook.com/sjgames) or [twitter.com/sjgames](http://twitter.com/sjgames). Share your brief campaign teasers with #GURPShook on Twitter. Or explore that hashtag for ideas to add to your own game! The web page for *GURPS Dragons* can be found at [gurps.sjgames.com/dragons](http://gurps.sjgames.com/dragons).

*Store Finder* ([storefinder.sjgames.com](http://storefinder.sjgames.com)): Discover nearby places to buy *GURPS* items and other Steve Jackson Games products. Local shops are great places to play our games and meet fellow gamers!

*Bibliographies.* Bibliographies are a great resource for finding more of what you love! We’ve added them to many *GURPS* book web pages, with links to help you find the next perfect element for your game.

## Page References

Rules and statistics in this book are specifically for the *GURPS Basic Set, Third Edition, Revised*, except for the Appendix. Any page reference that begins with a B refers to the *GURPS Basic Set* – e.g., p. B102 means p. 102 of the *GURPS Basic Set, Third Edition*. Page references that begin with CI indicate *GURPS Compendium I*. Other references are *GURPS Bestiary* (BE), *GURPS Cops* (C), *GURPS Cabal* (CB), *GURPS China* (CH), *GURPS Compendium II* (CII), *GURPS Dinosaurs* (D), *GURPS Discworld* (DI), *GURPS Egypt* (EG), *GURPS Fantasy Bestiary* (FB), *GURPS Fantasy Folk* (FF), *GURPS Grimoire* (G), *GURPS Greece* (GR), *GURPS High-Tech* (HT), *GURPS In Nomine* (IN), *GURPS Japan* (J), *GURPS Low-Tech* (LT), *GURPS Magic* (M), *GURPS Mecha* (ME), *GURPS Magic Items 3* (MIII), *GURPS Monsters* (MO), *GURPS Places of Mystery* (PM), *GURPS Robots* (RO), *GURPS Shapeshifters* (SH), *GURPS Spirits* (SPI), *GURPS Steam-Tech* (STE), *GURPS Steampunk* (STM), *GURPS Supers* (SU), *GURPS Vehicles* (VE), *GURPS Voodoo* (VO), *GURPS Vehicles Expansion 1* (VXI), *GURPS Warriors* (WA), and *GURPS Who’s Who 1* (WWI). CHAPTER  
2

# PLAYING WITH FIRE

*And the wild beasts of the islands  
shall cry in their desolate houses, and  
dragons in their pleasant palaces . . .*

— Isaiah 13:22

Breathing life into the fire-spouting lizard, beyond a few simple stereotypes and a liking for fresh meat, is a challenge for both players and GMs. How do dragons feed? Where do they live? Do they meet,

and if so, where? How does a creature that could live for centuries amuse itself, or relate to humanity? Finally, can this topic be interesting and varied enough to build a whole campaign around the subject?

## Peasant Heroes

When a rampaging monster oppresses the peasantry, or the aristocracy and professional warriors have demonstrated that they are not up to the job, a hero can step forth from the common people (or volunteer from the condemned cell). Sometimes his luck or skill matches his confidence.

Peasant heroes lean more on cleverness and trickery than other monster slayers. Ambushes, traps, and poison all appear in legends and folklore, and usually work. The dragons in these tales are animalistic, and low-intelligence. Even the ones that talk may fall for the fluent verbal trickery of a smart rustic, and will usually eat something unwise. Sometimes these tales end with the dragon's poison blood or splattered venom killing the unfortunate hero shortly after the battle.

## Knights in Shining Armor

Dragon myths mostly build *archetypes*, so the slayers are often trained specialists with good equipment and nice manners. Noble warriors tackle dragons and monsters in Greek, Persian, and Northern European myths, with similar success. Some heroes, like St. George, are also deeply pious, and the tale becomes a religious parable as much as an action story. But other dragon-slaying knights are simply good fighters.

If the knight charged home on horseback with couched lance, it could certainly do a *lot* of damage. However, the knight would need a reliable warhorse willing to charge in close to a huge, fire-breathing carnivore, and even after the charge, the dragon could still be standing. The hero often ends up on foot, hacking the beast to death with a heavy blade. Truly epic fights go on for hours or days. Even allowing for poetic exaggeration, heroes should have high degrees of fitness and reserves of fatigue.

## Armies

Monsters could be taken down by sheer force of numbers. This gets messy; the creature will probably chew through much of the rank and file before blood loss and lucky shots finally kill

## The Significance of Slaying

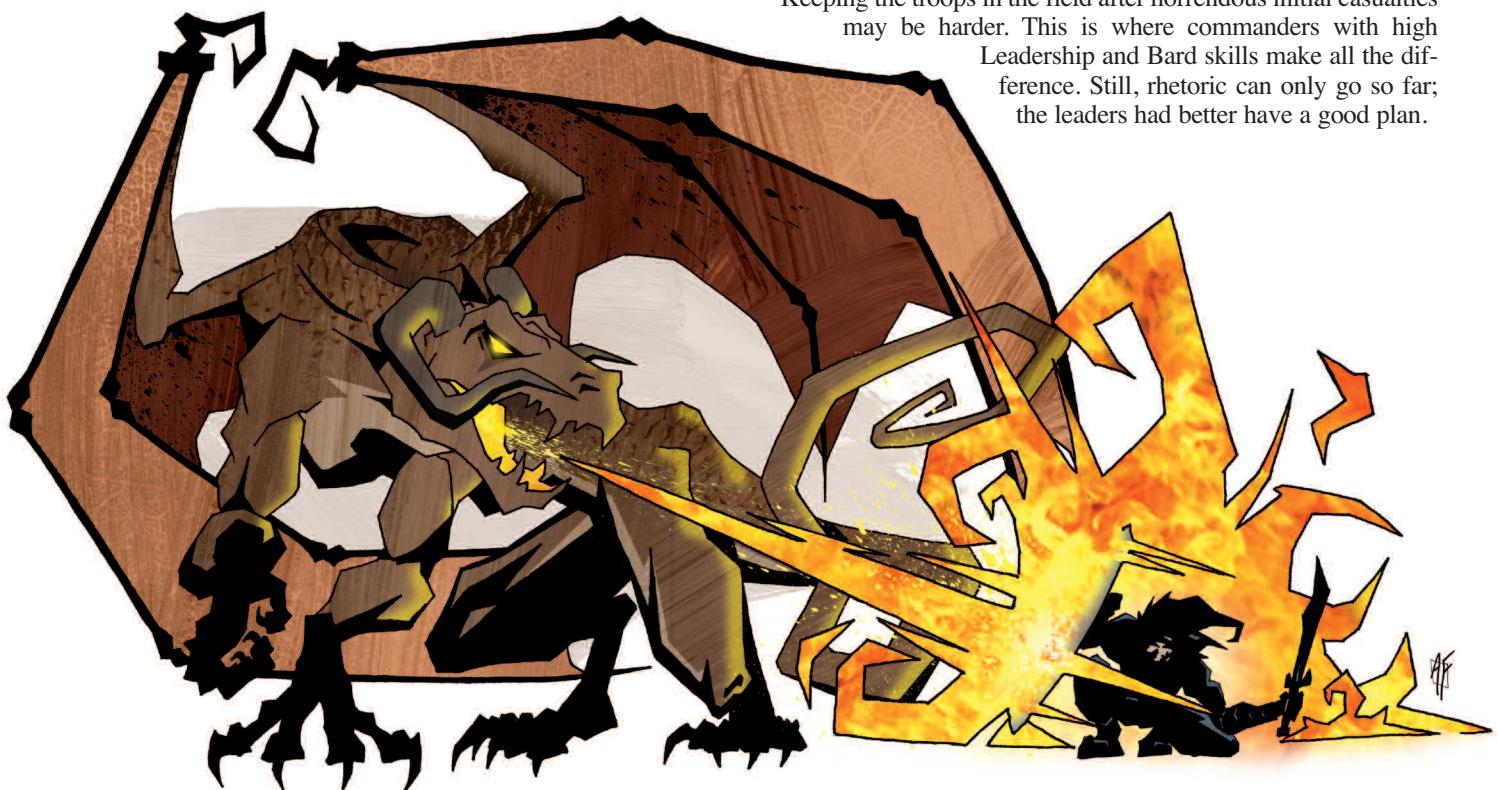

If dragons are special – more than just big, tough monsters – then killing one makes you significant, too. Conventionally, heroes who kill dragons are destined for greatness. Perseus (p. 9) was a son of Zeus, while Siegfried (p. 12) became the central figure of a great story-cycle. In many Christian tales, only saints could defeat dragons. Presumably, dragons were transcendently evil, only countered by supreme virtue. Several English towns and villages have traditional stories in which a terrible wrym was slain by a knight who then founded a leading local family (possibly developed as explanations of the mythical beasts on the local lords' coat of arms, or of some odd place name). Similarly, in tales such as Tolkien's *The Hobbit*, killing a dragon is a quick way to become a ruler.

Incorporating this principle into RPGs may be hard, although it should serve as a reminder that dragons are special, only deployed by a GM needing a memorable fight scene. However, if one PC has the Destiny advantage, a GM could maneuver that character into the starring role, even if dragon-slaying is not his Destiny in itself. Likewise, a Reputation as a dragon-slayer (merited or not) is often good for a +2 or better reactions.

it off. If the dragon's resilience lies more in soaking up damage than in bouncing it off invulnerable scales (in *GURPS* terms, lots of hit points instead of high DR), the mass assault may work. Also, if it is only vulnerable to lucky shots to a small weak point (p. 71), having plenty of people attacking means that chance should eventually favor the human side.

Mustering and heartening an army to attack a dragon will be difficult, but if the beast has been devastating the land, or has a huge hoard, a little impassioned rhetoric should do the job. Keeping the troops in the field after horrendous initial casualties

may be harder. This is where commanders with high Leadership and Bard skills make all the difference. Still, rhetoric can only go so far; the leaders had better have a good plan.

# FEAR AND FLAME

**Dragons Are:** Powerful to Very Powerful, Fairly Common, Intelligent, and Exotic.

**Dragons Represent:** Ravaging terror, threatening to devastate human civilization and even wipe out humanity altogether.

**PCs Are:** Tough human or similar heroes, struggling to acquire the power, skill, and knowledge to challenge the dragons.

This campaign puts a post-apocalyptic spin on conventional fantasy games – and dragons provide the apocalypse. Traditionally, full-sized dragons are a threat and a rarity; this campaign assumes that the threat has been realized, and dragons have become too common.

## The Campaign World

The simplest set up for this game's background involves two steps. 1. Take the map of a fantasy world. 2. Wreck it.

The basis should be a coherent, consistent fantasy setting, probably the usual pseudo-medieval elves-and-dwarves-and-wizards pattern. Feel free to use any published world, so long as you enjoy mangling it; Yrth (from the upcoming *GURPS Banestorm*) is a good candidate. Treat your choice the same way that post-apocalyptic thrillers treat the real world.

## The Dragons

Now, add wyrms. The world probably had them before, but they probably were rare, up in the mountains and on the map's edges. But something has changed.

Precisely what triggered the disaster should begin as a mystery to the PCs, and could be irrelevant to them for some time. In fact, you do not have to decide at first yourself. The following are some possibilities:

1. Dragons control their own fertility, but normally choose to keep themselves rare, to avoid competition for lairs and hoards. However, a few years ago, after too many respected wyrms were slain by bands of nasty little human adventurers, the dragon council resolved to end the problem by going on the offensive. Now, after decades of breeding and preparation, the dragon "army" has been unleashed. The elders will sort out the dragon population problem once the war ends.

2. Dragon breeding is a subtle mystery for human scholars, who do not realize that young dragons start out very numerous and very small, resembling mundane lizards. Breeding always takes place in wilderness areas, where another predatory monster species heavily thins out the young before they sprout wings and fly to mountains in search of lairs. Unfortunately, humans (or orcs, or dwarves, or somebody) consider the natural predator a problem, and a few years ago, a strong king organized a campaign of extermination. This ignorant mistake's effects created a generation of young firedrakes.

3. A wizard (or possibly a powerful, magically adept dragon) recently attempted a great spell – which suffered a disastrous failure. It opened gates to one or more worlds where dragons are common, or perhaps pulled the dragons through from several other worlds. (This could well be related to the "Banestorm" of

Yrth; if the game is set on Yrth, the Dark Elves may have tried their great spell again, even more disastrously than before.)

Other options and variations are possible; for example, the elder dragons from (1) could have sought a magical solution to their problem, leading to the great summoning of (3). GMs can get as complicated as they wish.

In any case, the dragons have now appeared – and attacked. The result is hardly a "war," as the dragons have no overall strategy. In some places, solitary dragons wander at random, plundering and destroying; in others, groups (perhaps families) of dragons work together methodically. Some dragons accept surrenders, and employ humans as slaves (though never as anything better). Others seek only to destroy. In some places, human heroes or armies have scored victories, and some communities are holding out, although they have a hard task defending their fields, but the fury and power of the sudden eruption, from so many directions, wrecked any initial chances of an organized defense.

Now, human forces are beginning to coordinate, but squabbles between leaders and uncertainty over the best strategy complicate matters – and far worse, some dragons, too, seem to be cooperating to plan their next moves.

## Dragon Types

GMs should pick a dragon species from Chapter 3, perhaps with a range of sizes or ages, for use as the main opposition. The standard Western Dragon (p. 56) is the obvious candidate. If the chosen back-story permits the involvement of multiple species, things can become more unpredictable for PCs.

Fighting wyrms on the plains, small flying dragons in the mountains, and sea serpents on the oceans, would call for a greater range of tactics, and may increase the sense of viciously hostile world.

## CHARACTERS

This straight-down-the-line dragon-slaying campaign pitches bands of heroic human (and other) adventurers against lots of big lizards. There will lots of combat, lots of glory, and almost certainly lots of dead heroes. Bloodthirsty slayers simply wanting combat will have every opportunity, but diplomacy, strategy, and planning, will all be necessary as communities struggle to organize.

- 
- 1. Take the map of a fantasy world.**
  - 2. Wreck it.**
- 

Players should therefore be competent and combat-oriented. The optimum starting point level depends on the campaign style and the average dragon's power level, but 150-200 point characters may fare better than the usual 100-pointers. Overwhelmed individuals may have to be disposable – but hey, they get to try to kill dragons. A lot. Groups consisting entirely of tough or canny warriors fit the post-catastrophe theme, but leavening these with a few wizards and healers may make for better survival chances.

# STUCK FOR AN ADVENTURE? NO PROBLEM.

**Warehouse 23 sells high-quality  
game adventures and supplements  
in print and PDF formats.**

- Free downloadable adventures for *GURPS* and *In Nomine*!
- Fun gaming accessories – shot glasses, shirts, specialty six-siders, and more!
- PDFs from Atlas Games, Amarillo Design Bureau, Goodman Games, and many others – plus gems from the up-and-comers.
- Original material for *Transhuman Space* and new *GURPS* supplements from Kenneth Hite, Phil Masters, David Pulver, Sean Punch, and William Stoddard!
- Fully searchable files of *GURPS Fourth Edition* supplements.
- Digital editions of out-of-print classics, from *Orcslayer* and the complete run of *ADQ* to *GURPS China* and *GURPS Ice Age*.
- Buy boardgames and roleplaying PDFs in the same order! Download digital purchases again whenever you need to.
